The great outdoors

Create the perfect environment

The new Patiomaster sliding patio door has been designed to meet the needs of the most discerning home owner. Not only does it look superb, it is secure, strong, gives excellent protection against the weather, and reduces noise.

High levels of security are achieved through multiple locking points, combined with a built-in 'anti-jacking' system, that ensures that the door cannot be lifted off from the outside. The frames are made from high impact resistant PVC-U which is also easy to keep clean.

Tested technology

High levels of insulation against the weather are achieved through the combination of thermally efficient PVC-U frames, built-in weather seals, and sealed double glazing units. Background ventilation can also be provided.

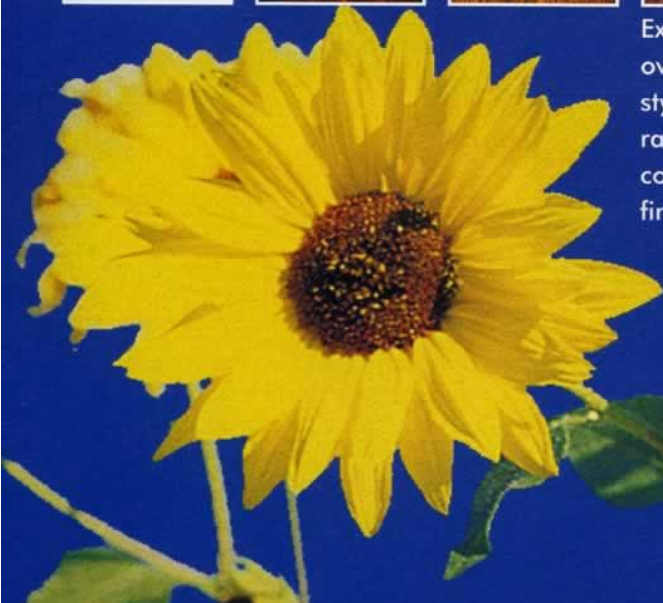

With just a fingertip touch, the parallel sliding panels glide effortlessly on double rollers along a stainless steel track.

Fuss free fitting

The door is specially designed to be efficiently installed, causing minimum disturbance to existing decorations and plaster.

Express your own individual style with our range of colour and finish options

Looks good feels great!

The door has a slim-line appearance, making it ideal for both modern and traditional properties alike.

When installed in your home, you can rest assured these doors have been designed, developed, and extensively tested under strict quality control standards, to give high performance with minimum maintenance for many years to come.

Enjoy your garden more

In-line sliding patio door

New Low threshold patio door

PatioMaster is ideal as a conservatory partition or room divider thanks to the addition of a new low threshold, low track system.

The new low track system incorporates a double panel sliding facility and built-in drainage for situations where the door may be exposed to external elements.

For more details, call us now or use the fax-back overleaf.

- New LOW TRACK, LOW THRESHOLD system, which minimises step height (max height 28mm).
- Robust aluminium construction.
- Ideal for conservatory partitions, room dividers or porch doors.
- Suits all PatioMaster options.
- Double panel sliding facility, for maximising access.
- In-built drainage, for external applications.
- Stainless steel track system, for improved sliding ability.
